NAPOLEON GAS FURNACE

Engineered and made in Canadian. Your residential central heating system must be safe and reliable, in addition to providing comfort and efficiency to your family for many years. Napoleon offers you the best in the industry: superior design, advanced technology and a passion for customer satisfaction. All devices of our online gas furnaces, consisting of the series 9500 and 9600 provide exceptional AFUE yield of 95% and 96% and the swirl system Vortex, installed inside the heat exchanger, will amplify this effectiveness by disturbing the natural flow of air and relieve the maximum heat from the flue gas. To all this is added the electronic switching ECM energy-efficient engine that reduces power consumption up to 80% compared to conventional blower motors, allowing you to realize significant savings. The devices of both series, available in two widths, are the smallest on the market. As they are at zero and adaptable clearances in four configurations, they offer opportunities for multi-purpose facilities, practical and simple.

Manufacturer limited warranty:

10 years on parts, limited lifetime warranty on the heat exchanger.
